CMS R7120 - Maintenance

- Login: Fixed Forgot Password incorrectly requiring a case sensitive email address.

- Licences: Fixed issue when selecting a Mako with incorrectly displaying a warning about a licence about to expire when it already has a new licence.

- PCI: Users must enable 2-factor authentication for their user accounts if any Makos in their company need PCI DSS.

- PCI: PPTP is no longer available for Makos that need PCI DSS.

  PPTP: Fixed issue with PPTP settings not updating correctly in rare situations.

- Users: Allow 'NoLogin' users to be created.

Have a suggestion to improve your experience with the Mako System?
