CMS R8320 - New Features and Improvements

Site Network Diagram Improvements
We've improved the usability and information displayed in the Site-wide network diagram, as well as fixed a few bugs along the way. The diagram works best when Mako devices are running the most recent firmware version.

Diagnostics Improvements
We've improved the usability of the diagnostics screens to make it quicker and faster to run the diagnostics you need.

CMS R8320 - Maintenance

- Alerts: Improved wording of Monitored Host alert emails.

- Audit: Added audit event when Enterprise Templates are bulk pushed.
