

CMS R8400 - New Features and Improvements

● Updated Reports

We've updated the look and feel of several reports in the Reports section of the Mako Central Management System (CMS).

● Scheduled Remote Reboot

We've added the ability to schedule a one-off remote reboot of a Mako device, allowing for easier reboots during out of hours.

CMS R8400 - Maintenance

● Diagnostics: Fixed issue with wrong WAN interface used for the speed test diagnostic.

● Diagnostics: Removed commas from VLAN IDs in VLAN diagnostics.

● Failover: Fixed issue when adjusting Mako Failover advanced settings.

● General: Refreshed the wording of the 404 Not Found page.

● Password Reset: Fixed issue with copy pasting new passwords into the password reset form.

● Provisioning: Fixed issue with allocating/deallocation Mako IDs on certain profiles.

● Reports: Fixed issue with viewing usage reports for WAN 5 on Mako 7600 series.

● Site Network Diagram: Small fixes and improvements to the diagram.

● Sites: Fixed issue with Edit Site modal resizing.

Have a suggestion to improve your experience with the Mako System?
