

CMS R8540 - New Features and Improvements

● Automated Speed Tests

We've added support for automated daily/weekly/monthly speed tests, with reporting across an entire estate to identify problematic connections and associated SLA issues. Speed Tests can be configured in the Speed Tests section of a Company, and ad-hoc tests can be performed in the Diagnostics section of a Mako device.

CMS R8540 - Maintenance

- API: Added ability to list all companies the user has access to.
- Firmware: Added ability to bulk move Makos between update windows.
- Mako Status Widget: Fixed Cellular information tooltip not displaying information for Mako devices running older firmware.
- Mako Status Widget: Fixed issue where the widget does not show a Mako device changing from offline to online.
- PCI DSS: Fixed issue with display of PCI Groups that were converted from shared to private scope.
- PCI DSS: Improved layout of the PCI Summary timeline.
- STP: Improved error messages when configuring STP parameters on Mako Managed Switches.

Have a suggestion to improve your experience with the Mako System?
