CMS R8570 - New Features and Improvements

- **PCI DSS v4.0**
  We've updated the SAQ generation service to support the PCI DSS v4.0 SAQ forms.

- **Reports Update**
  We've updated the look and feel of the various Mako-specific reports, including usage and Mako Guardian reports.

CMS R8570 - Maintenance

- API: Fixed issue with low rate limits on various API calls.

- Hotspot: Fixed issue with Hotspots not working when attached to a 4-digit VLAN ID.

- Login: Various small quality of life improvements and fixes.

- Merchant PCI: Various small quality of life improvements and fixes.

- Search: Fixed issue selecting a Site in the universal search screen.

- Site Diagram: Fixed issue exporting the site network diagram in Firefox.

- SSO: Added warning when SSO is enabled but no providers configured.

- VLAN: Fixed issue with saving VLAN IGMP settings.
