

CMS R7500 - New Features and Improvements

- **Enhanced IDS**

You can now configure Enhanced IDS on Mako 6600, 7582, 7600, 8600 appliances. Requires Makos running F6120 or newer firmware.

- **AP Scanning**

All Makos with Wi-Fi radios now support AP Scanning. You can now receive alerts when new APs are detected. Requires Makos running F6110 or newer firmware.

- **NetFlow**

We've added the ability to configure NetFlow on Mako 6600, 7582, 7600, 8600 appliances. Requires Makos running F6110 or newer firmware.

- **Time-limited Enterprise Templates**

It's now possible to subscribe to an enterprise template for a limited time.

- **Enterprise Template Firewall Rules Import/Export**

We've added the ability to import and export firewall rules in enterprise templates.

CMS R7500 - Maintenance

- **Audit:** Added ability to export audit events as CSV and PDF.

- **Diagnostics:** Added system uptime diagnostic.

- **Diagnostics:** Renamed VPN diagnostics to IPsec diagnostics.

- **Diagnostics:** Added tunnel uptime, packet counts, and other information to IPsec Setup diagnostic. Requires Makos running F6020 or newer firmware.

- **Guardian:** Fixed issue with Guardian automatically activating depending on licencing.

- **DHCP:** Fixed issue with DHCP lease renumbering when LAN subnet mask changed.

- **Performance:** Improved performance of companies with large numbers of Makos.
