

CMS R7610 - New Features and Improvements

● Dashboard

We've added a new dashboard designed with NOCs in mind. You can easily monitor the status of your estate in a single global view.

● Mako Managed Switches

We've added support for Mako Managed Switches.

● VPN Cloud Concentrator Interconnect

We've added a new option in VPN Cloud to automatically interconnect concentrators between each other.

CMS R7610 - Maintenance

- Failover: Fixed issue with disabling max latency and packet loss thresholds.

- Firewall: Fixed issue with removing Absolute Threshold blocks.

- Firewall: Improved performance of Intranet and Outbound firewall rule screens.

- Login: Improved wording of Login Failure emails.

- Metadata: Added support for Metadata suggestions.

- Reports: Added WAN failover count to Network Availability Report.

Have a suggestion to improve your experience with the Mako System?
