

CPE F6300 - Features and Improvements

● **Diagnostics Improvements**

We've added support for running multiple concurrent diagnostics, such as a ping or traceroute at the same time as a packet capture.

CPE F6300 - Maintenance

- Cellular: Improved cellular recovery time after an outage.
- Diagnostics: Improved speed of Cellular Restart diagnostic.
- IPsec: Upgraded IPsec software.
- IPsec: Improved stability of IPsec tunnels on Virtual Makos.
- Mako Failover: Added optional BGP peer awareness to Mako HA failover between two Makos.
- Network: Upgraded DNS and DHCP software.
- Routing: Upgraded BGP/routing engine software.

Have a suggestion to improve your experience with the Mako System?
We'd love to hear from you! support@makonetworks.com
